FLORIDA
ROOFING GUIDE

CONTRACTOR COMPARISON SHEET

Florida is the most difficult state to build a roof up to code in. Out of state companies who just set up shop in Florida can cause you years of headaches.

Make sure your home isn't someone's experiment

Mark Fischer recommends Storm Team Construction, Inc.

September 14, 2021 ·

Storm Team Construction did an outstanding job with my roof replacement.

They were punctual, very neat, and the crew worked so diligently in the tough south Florida summer heat, while dodging almost daily afternoon thunderstorms.

It was a great experience end-to-end... from the sales and proposal process, to the HOA and Town permitting and approvals process, to materials delivery, roof tear-off and install, daily clean-ups, Town approvals and final wrap up.

Highly recommended Storm Team Construction without reservation.

Positive: Professionalism, Punctuality, Quality, Responsiveness, Value

I've been in the South Florida construction industry for 40 years. When Storm Team approached me concerning the condition of my roof I was skeptical to say the least. After discussing the situation I realized Barney was very knowledgeable and told him to proceed. The whole experience went smoothly from start to finish. Much quicker than I had expected. Even the clean up crew were spot on. I would recommend Storm Team for any roofing issues you may encounter. Barney even educated me on the built in flaws of structural gutter systems that I had no idea about!!

We were impressed with how smoothly the roof replacement project progressed. STC communicates fully and works well with insurance, community and town guidelines. We would recommend them to our friends and neighbors.
